Second Section

A subsection

- This is a beamer presentation.
- You can use the prosper and the HA-prosper syntax.
- This is done by mapping prosper and HA-prosper commands to beamer commands.
- The emulation is by no means perfect.

A frame created using the `frame` command.

- You can still use the original beamer syntax.

A frame created using the `frame` command.

- You can still use the original beamer syntax.
- The emulation is intended only to make recycling slides easier, not to install a whole new syntax for beamer.
