NAME
ares_destroy – Destroy a resolver channel

SYNOPSIS
#include <ares.h>

void ares_destroy(ares_channel *channel***)**

DESCRIPTION
The **ares_destroy** function destroys the name service channel identified by *channel*, freeing all memory and closing all sockets used by the channel. **ares_destroy** invokes the callbacks for each pending query on the channel, passing a status of **ARES_EDESTRUCTION**. These calls give the callbacks a chance to clean up any state which might have been stored in their arguments.

SEE ALSO
ares_init(3), **ares_cancel**(3)
